"Hybrid production of Golden Cross"

SEEDS OF QUALITY

For 65 years we have specialized in the breeding and growing of peas and beans. Many new varieties originated on our Trial Grounds. Standard old varieties have been improved for type or disease resistance wherever possible. Year-round work, through green house and in the open field, has been maintained not only in good years, but in lean years as well.

Because of these facts, we offer you our services as a source of seed supply in which you can have every confidence that no effort will be spared to furnish well bred stocks of the highest possible quality.
